

AMENDMENTS TO THE CLAIMS

The Listing of Claims below replaces all prior versions, and listings, of claims in this application. Claims 1-12, 14 and 16-20 are pending and under examination. Claims 13 and 15 were previously cancelled and claims 21-26 are cancelled herein.

Listing of Claims:

1. (Original) A computer system useful for evaluating trading interests, comprising: a buyer terminal having an output device for presenting offerings of the interests and an input device for entering one or more investment criteria; and a computer coupled to the buyer terminal, a data store coupled to the computer including offerings of a plurality of trading parties, the computer including programming for selectively identifying from the data store offerings of the plurality of trading parties responsive to the investment criteria, the computer providing information related to identified offerings responsive to the investment criteria of all trading parties for presentation together on the output device.
2. (Original) The computer system as set forth in claim 1, wherein the computer provides to the output device a presentation, in an integrated fashion, of information related to identified offerings of at least two of the plurality of trading parties.
3. (Previously Presented) The computer system as set forth in claim 1, wherein the computer provides to the output device a presentation of information related to identified offerings in a summary view.

4. (Original) The computer system as set forth in claim 3, wherein responsive to a selection entered via said input device identifying a trading party presented in the summary view, the computer provides a listing of all offerings from the data store of the one selected trading party for presentation on the output device.
5. (Original) The computer system as set forth in claim 1, wherein the investment criteria includes buyer-defined values for terms of the offerings.
6. (Original) The computer system as set forth in claim 1, wherein the investment criteria includes buyer-defined values for at least one of maturity, size, yield, credit ratings and trading party of the offerings.
7. (Original) The computer system as set forth in claim 1, wherein the investment criteria includes parameters that specify an order for presenting offerings information retrieved from the data store.
8. (Original) The computer system as set forth in claim 1, wherein the computer system includes memory for storing the investment criteria, the computer upon command selectively identifying the offerings in the data store based on investment criteria stored in the memory.
9. (Original) The computer system as set forth in claim 1, where the computer comprises programming for selectively granting buyers authority to view offerings of the trading parties, and for selectively preventing retrieval and display of offerings to unauthorized buyers.

10. (Original) The computer system as set forth in claim 1, wherein the computer comprises programming for selectively granting buyers authority to execute offerings of dealers.

11. (Original) The computer system as set forth in claim 1, wherein the computer comprises programming for selectively limiting access to offerings of predetermined ones of the plurality of trading parties.

12. (Original) In a computer system for trading interests including a plurality of buyer terminals having an output device and an input device, and a central computer linked to the buyer terminals by a communication system, the improvement comprising a data store coupled to the central computer including offerings of a plurality of trading parties, the central computer including programming for selectively identifying from the data store offerings of a plurality of trading parties responsive to at least one investment criterion entered via an input device of a buyer terminal, the central computer transmitting to the buyer terminal for presentation on the output device the information related to identified offerings of each trading party having an offering responsive to the at least one investment criterion..

Claim 13. (Canceled)

14. (Original) A method for evaluating trading interests, comprising: entering at least one investment criterion into a computer system in which are stored trading interests of a plurality of parties; retrieving information relating to offerings of the interests from a

plurality of trading parties responsive to the at least one investment criterion; and
presenting, in an integrated fashion, the retrieved offerings information of the plurality of
trading parties.

Claim 15. (Canceled)

16. (Original) The method as set forth in claim 14, comprising; sorting the retrieved
offerings information in accordance with sorting information included within the
investment criteria, wherein the step of presenting includes presenting the retrieved
offerings information in the sorting information.

17. (Original) The method as set forth in claim 14, comprising storing entered investment
criteria and upon request, retrieving the stored investment criteria and applying the
retrieved investment criteria to again retrieve offerings of the plurality of dealers.

18. (Previously Presented) The method as set forth in claim 14, comprising a trading party
granting authority to a buyer to view offerings information of the trading party and
preventing retrieval and display of offerings information of the trading party to
unauthorized buyers.

19. (Previously Presented) The method as set forth in claim 14, in combination with a
method for trading offerings, comprising the step of a trading party granting authority to a
buyer to execute offerings of that trading party.

20. (Previously Presented) The method as set forth in claim 14, comprising the step of a
buyer limiting that buyer's access to offerings of predetermined ones of the plurality of
trading parties.
